## Secure Identity Systems Offers Consumers Free ID Theft Protection Tool

Every two seconds, someone in the United States becomes a victim of identity theft. Secure Identity Systems is dedicated to ensuring its customers aren't among those numbers. In an effort to further protect against this crime, the company is now giving all customers who enroll in their ID protection services within the next 60 days a free copy of LegacyGuard, a software application that stores all of an individual's important financial and legal information in one, password-protected place. LegacyGuard is currently valued at \$49.95.

By storing all credit card and bank account records, tax returns, insurance policies, and other documents containing sensitive personal or financial information in one secure place, LegacyGuard helps prevent loss of data, and provides one more defense in the battle against ID related losses. And in the event of physical injury, mental illness or death, LegacyGuard will ensure a seamless transition of affairs, saving your loved ones from the tremendous stress and amount of time required to manage your estate.

"Identity fraud is a devastating crime, resulting in losses of thousands of dollars, hundreds of hours spent trying to recover, and most importantly, your good name," says Bryan Ansley, CEO of Secure Identity Systems. "At Secure Identity Systems, we realize just how extensive the damage from ID fraud can be, and are dedicated to developing new technologies and offering new services that will prevent our customers from becoming victims. By providing new customers with this gift, we're giving them one more tool they can use to protect themselves and their loved ones."

Secure Identity System takes a four-pronged approach to identity fraud protection and recovery with a program that includes total identity monitoring, complete breach resolution, expense reimbursement insurance, and ongoing education services. In addition to credit, Secure Identity Systems monitors thousands of other databases that use Social Security numbers to catch any instances of non-financial related ID theft. The company also retains a staff of Certified Identity Theft Specialists that, should a breach occur, works directly with victims and helps them through the recovery process.

For more information on how to enroll in Secure Identity Systems' identity theft program, visit [www.SecureIdentitySystems.com](http://www.SecureIdentitySystems.com) or call 615-377-7661.
